COMPANY OVERVIEW

PROSOMNUS®
SLEEP TECHNOLOGIES

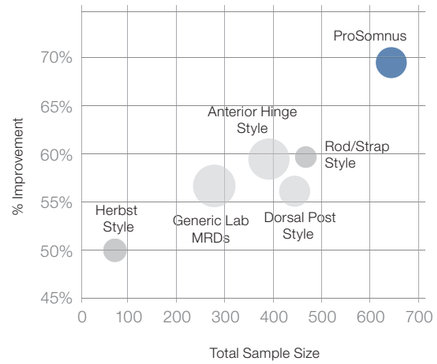
Why Are Sleep Medicine Experts Choosing ProSomnus®?

ProSomnus was founded on the premise that precision Sleep Medicine can enable providers to achieve better outcomes for more OSA patients, and that traditional OAT devices were a limiting factor.

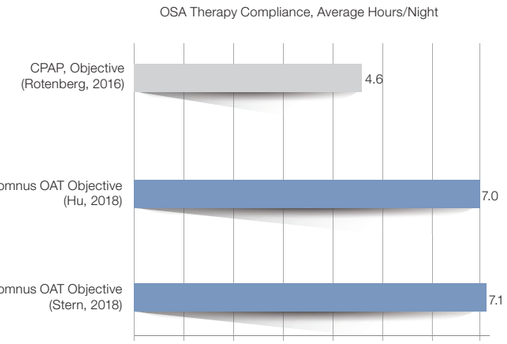
Today, ProSomnus Sleep Devices are preferred by patients, providers, physicians and payers over CPAP and traditional oral appliances. ProSomnus is the first manufacturer of mass-customized precision Oral Appliance Therapy devices to treat OSA and the only OAT Medical Device manufacturer exclusively dedicated to helping providers create better treatment experiences.

What does ProSomnus precision OAT mean for providers and their patients? Indications of:

Better Efficacy[1]



Better Compliance[2][3]



Engineered for Fewer Side Effects

Side effects are a top 5 reason MD's do not prescribe OAT[4]

Oral Appliance Therapy Awareness and Perceptions Survey

No statistical change in tooth position[5]

Assessment of Potential Tooth Movement and Bite Changes With a Hard-Acrylic Sleep Appliance: A 2-Year Clinical Study

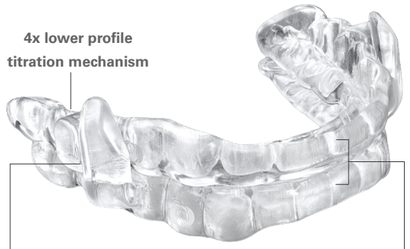
2.5x to 5.0x less porosity for bio-gunk[6]

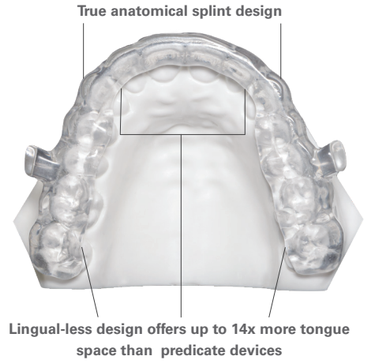
Say NO to Bio-Gunk!

ProSomnus EVO® Guided

New!

The only OAT device engineered to dilate the velopharynx and the oropharynx.





The Insight
94% of airway collapse involves the velopharynx†. Protruding the mandible dilates the oropharynx but has only indirect effects on the velopharynx.

The Solution
EVO Guided is engineered to prevent airway collapse by repositioning the hyo-glossal complex:

- Guiding and repositioning the mandible
- Guiding and encouraging an anterior tongue posture
- Guiding mouth closure
- 100% made from the provider's oral records, no prefabricated components and no modifications from your prescription

Why EVO Guided?
Prescribe EVO Guided as your frontline device. Engineered to optimize efficacy, patient satisfaction, and adherence, EVO Guided supports improved outcomes in value-based care. Its precision design helps mitigate side effects and reduce costly non-responder cases, making it a smart choice for both patients and practices.

MG6™ Technology | ISO 10993 compliant | US Military drop test compliant | BPA Free
Less porous, biocompatible and hygienic | Proprietary engineering and manufacturing

DESIGNED FOR AADSM EFFECTIVE OAT DEFINITION

Provider Testimonials

"The new ProSomnus EVO Guided device is super easy for insertion; offers a perfect fit every time and patients have reported it to be extremely comfortable. Given the very low profile and lingual-less design, it's becoming a preferred device option for our GoTo Sleep Centers." —Stacey C. Layman DDS, D-ABDSM

"ProSomnus EVO devices fit seamlessly with zero adjustments. The new EVO Guided device, featuring an additional 5 degrees of post taper, eliminates the need for elastics to manage jaw drop—its enhanced post angulation provides ideal support. Existing EVO users who have upgraded to EVO Guided appreciate the increased tongue space due to reduced appliance bulk, allowing for greater comfort. With less material interference, less protrusion may be necessary, enabling the tongue to achieve its natural, unobstructed position more efficiently." —David E. Federici, DMD, D-ABDSM

"ProSomnus has pushed the bar higher with its new EVO Guided device. Reduced thickness and minimal encroachment of the tongue space, the ability to be a velopharynx dilator, and the elimination of needing elastics all lead me to now choose the EVO Guided as my number one choice for my patients." —Ben Utterback, DDS, D-ABDSM

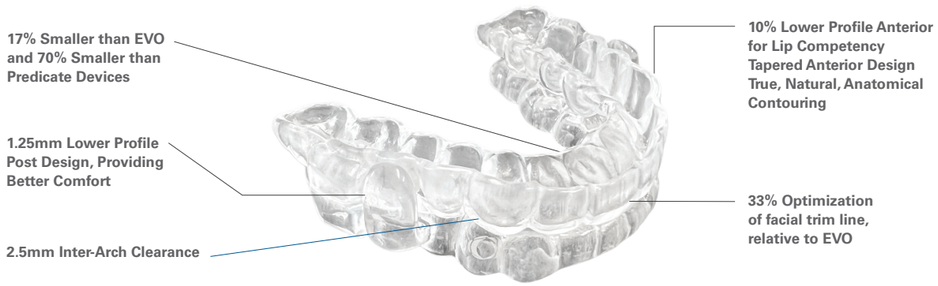
ProSomnus EVO Select

Engineered for performance, biocompatibility and the greatest comfort.

A signature variation of the ProSomnus EVO Device, EVO Select is optimized for patients who may benefit from a more compact, effective and easy to use precision OAT medical device using the most innovative materials.



- ✔ **96% of Providers had easy delivery, no adjustments**
- ✔ **95% of Providers preferred over [IA] Select**
- ✔ **98% of Providers would prescribe and recommend**
- ✔ **38% Less vertical required, relative to predicate devices**
- ✔ **Monogram customization options for full contact, 2.0mm discluder and elastic hook design**

MG6™ Technology | ISO 10993 compliant | US Military drop test compliant | BPA Free
Less porous, biocompatible and hygienic | Proprietary engineering and manufacturing

DESIGNED FOR AADSM EFFECTIVE OAT DEFINITION

Provider Testimonials

"The ProSomnus EVO Select precision device has elevated the bar for Oral Appliance Therapy. It has the highest medical grade class VI material, providing a comfortable and streamlined design leading to greater patient satisfaction, compliance and improved clinical outcomes." —Nicole DeCaria Chenet, DDS, D-ABDSM

"Our practice is having 100% success with the deliveries of ProSomnus EVO Select devices. The seating appointments are seamless. The product for the patient is incomparable to others. Time saved chairside is a no brainer."
—Ashley Owens, Sleep Champ for Kuhn Dental Associates

ProSomnus EVO

For preferred OSA therapy.

ProSomnus EVO is the first OAT device to incorporate advanced materials, manufacturing robotics and artificial intelligence to advance the treatment of OSA.

Patients prefer EVO to their CPAPs and legacy OAT devices in a controlled IRB Study.

Providers prefer EVO's material flexibility, patient customization, ease of delivery and increased durability.

Physicians prefer EVO's design requirements, allowing the mitigation of side effects and promotion of oral appliance adherence utilizing medical grade MG6™ technology.

Payers prefer EVO's adherence, effectiveness, warranty, and daily treatment reimbursement expense. EVO's net device cost of treatment is 33% less than CPAP or predicate oral appliances.

Provider Testimonials

"If CPAP was the GOLD standard for OSA treatment, ProSomnus EVO is the gold standard for OAT! There simply are no tradeoffs with this material and design. Monolithic, precise, incredibly comfortable and designed to prevent side effects that commonly arise. As an ENT sleep physician, I must say, this is the kind of solution that the medical community has been waiting for." —Edward T. Sall, MD, DDS, MBA

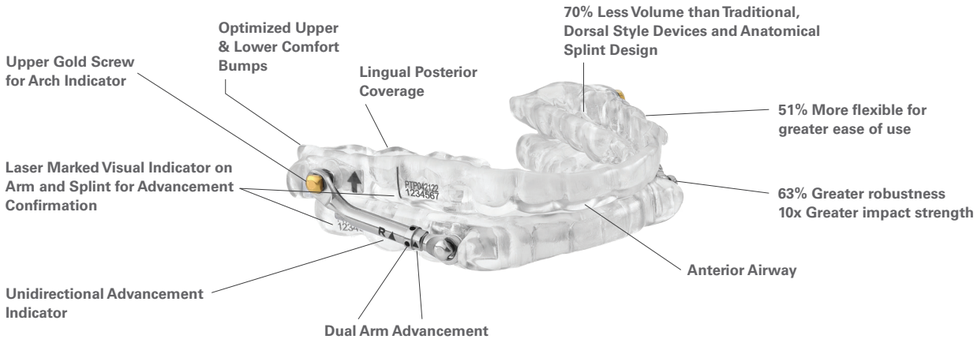
"ProSomnus EVO reminds me of the comfortable cotton socks I put on every morning. They always fit, they conform and after it is in place, you forget about it. Marrying a flexible design without sacrificing the impermeability took some magic. Kudos to ProSomnus!" —Kent Smith, DDS, D.ABDSM, D.ASBA

"As a DSM clinician, predictability and reliability are key to successful patient treatment outcomes. Prescribing ProSomnus EVO has met those needs with first time fit while providing our patients with exceptional durability and comfort which leads to compliance. All of this and seeing great results through better efficacy, makes EVO a winning device for our practice."
—Neal Seltzer, DMD, FAGD, D.ABDSM, D.ASBA, D.ACSDD

ProSomnus EVO [PH]

The only precision Herbst-style Medical Device with Advanced Materials for OAT.

ProSomnus EVO [PH], newly designed for a more robust Herbst-style arm. FDA cleared and Medicare E0486 verified. EVO [PH] is the only dual arm advancement device with innovative materials, manufacturing robotics and artificial intelligence designed to provide a better experience for all patients. Incorporating the ProSomnus precision OAT platform, EVO [PH] offers the best comfort, first-time-fit and reliability for a Herbst-style advancement mechanism providing 7.0mm total titration. EVO [PH] comes with a Best in Class, 3+2 Year Warranty.



- ***NEW*** ✔ **Stronger torquing arms, designed for the greatest durability**
- ***NEW*** ✔ **10x Greater impact strength**
- ***NEW*** ✔ **63% Improvement in splint robustness**
- ***NEW*** ✔ **51% More flexible for greater ease of use**
- ***NEW*** ✔ **7.0mm and 4.0mm short arm option for smaller arch forms**
- ✔ **Highest medical grade class VI, biocompatible material**
- ✔ **Less volume than traditional, dorsal style devices**
- ✔ **Providers experienced first-time-fit, just like EVO**
- ✔ **Providers would prescribe and recommend**
- ✔ **Providers had no adjustments**
- ✔ **Patients reported a smaller, more natural and comfortable device**
- ✔ **True patient anatomical splint design**
- ✔ **Metal-free and button hook design options**

DESIGNED FOR AADSM EFFECTIVE OAT DEFINITION

Provider Testimonials

"ProSomnus listened and has created unique changes to the traditional Herbst appliance. One of which is the creation of 'comfort bumps'. Now the most common complaint from patients using a Herbst-style appliance has been successfully addressed!" —Kenneth A. Mogell, DMD, D.ABDSM

ProSomnus EVO [MOG]

The first precision Morning Occlusal Guide.

The ProSomnus [MOG] makes it easy to maintain or re-establish the bite in accordance with AADSM Guidelines[1] and select insurance reimbursement codes. Precision milled from digital records, the ProSomnus [MOG] is the only Morning Occlusal Guide that offers peace of mind that the bite can be recaptured for the duration of therapy—even if the initial Morning Occlusal Guide needs to be replaced.

Featuring three options for use with your sleep device cases based on clinical preference:

EVO [MOG]

Design includes an anterior bite ramp.*

EVO [MOG] MIP

Design enables true, full occlusal contact.*

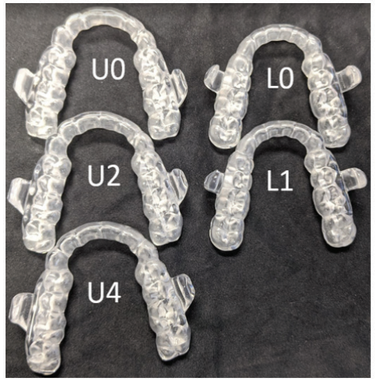
EVO [MOG] MIP Anterior Only

Design enables complete, occlusal contact.*

The objective of any [MOG] is to help re-establish the patients MIP after wearing a Mandibular Advancement Device. That can be done many ways. It usually involves a ramp that wedges the mandible back (just as their own teeth will) or it may have some soft material that helps the musculature seat the mandible back into place. The precision, durability and reproducibility of the mandibular path and position are an advantage that provides peace of mind. You always have a guide to help re-establish the pre-treatment position.

*NOTE: The patient's occlusion, positioning of the teeth, and interarticular space in the anterior and posterior when the patient is in MIP, all contribute to whether or not a patient can achieve full posterior contact with the [MOG] in place. Manufacturing guidelines may also pose certain limitations.

EVO Advancement Guide



5 DEVICES U0, U2, U4, L0, L1	COMBINATION	ADVANCEMENTS	DATE	NOTES
	Upper 0 + Lower 0	0 mm		
	Upper 0 + Lower 1	1.0 mm
